

REINFORCED CONSTRUCTION PAPER

FOR SURFACE PROTECTION

A laminated heavy duty kraft paper reinforced with filaments for superior performance in surface protection. Used for finished floors/surfaces during construction or remodeling/repair. It can work in conjunction with other protective products to help minimize surface scratches and rework.

FEATURES & BENEFITS

- Skid, slip and scratch resistant
- Pliable protection for floors, countertop, stairs, and other surfaces
- Non-bleeding and non-staining
- Outstanding tear resistance
- Less slick than plastic and water resistant- holds up to heavy cart traffic in hospitals
- Vapor permeable but moisture resistant, helping to prevent liquids soaking through and causing damage
