UMBRA ROOF UNDERLAYMENT

DESIGNED TO REPLACE #15 AND UNRATED OIL SATURATED FELTS

Umbra™ represents the future of synthetic roofing underlayment. Made from a completely waterproof construction of woven polypropylene and a non-woven topcoat, Umbra forms a barrier in your roofing system that helps protect residential or light construction roofs in the most extreme weather conditions. Umbra Roof Underlayment delivers exceptional long-term weather barrier performance compared to traditional asphalt felt products. For use under asphalt shingles.

One 10-square roll = five felt rolls!

FEATURES & BENEFITS

COST REDUCTION

- Lightweight – shipping, staging, installing; significantly lighter than comparable asphalt felt products (10-square roll is only 23 lbs)
- Requires fewer fasteners and fewer repairs than typical asphalt felt products

INSTALLER FRIENDLY

- Horizontal marker for overlap
- No special tools required
- Nonwoven topcoat provides exceptional anti-slip properties
- Lighter weight – reduces worker fatigue and reduces potential for worker injury (10-square rolls only 23 lbs)

COVERS MORE

- Greater roof coverage per roll than traditional roofing felt

PROTECTION

- Natural UV protection – can be left exposed for up to 30 days
- Exceptional tear and puncture resistance
